

Fall / Winter Bulletin  
November 28<sup>th</sup> 2016

## MESSAGE FROM THE MAYOR

Each and every month, as Mayor, reviewing all the municipal issues of Barkmere, I must ask myself the following question for each one: should we act or not? Someone energetic like me has the tendency to answer that we must act (and quickly!). But this is not always the right answer. Sometimes, to wait and to let things fall into place is more beneficial in the long term. Some problems require action, others, patience.

To take the right decision, we must often refer to some sort of guideline for our actions. For me, it is always the preservation of Bark Lake and the forest around it. This objective is paramount because it is the “raison d’être” of our Town, the sole unifying principle of almost all of our community. Nobody wants to see the Lake becoming polluted, the forest to disappear and the joy of living here become a thing of the past.

The end of the year, in a municipality, is the time for budgets. And since municipalities are financed almost entirely by the taxes levied to the property owners, yearend is the time to take some of the most difficult decisions of the year. Seven people will decide together on the tax bill for all the rest of the community. This exercise is particularly trying for a small municipality like Barkmere. The expenses are already very restricted, without any space to maneuver, and with the reduced taxation basis, any additional expense, even relatively small, has a major effect on the tax rate. For Barkmere, more or less, \$5,000 of additional expense is equivalent to a tax increase of 1%.

Some expenses are imposed on us, and we must make do with them. This is the case for the costs related to the new North-West Fire Services Public Company. We are still negotiating a service agreement for Barkmere, but given that it is the only fire service in the surroundings, we will have to face an increase of cost of about \$10,000 for 2017. 2% in tax increase.

The cost of living increases every year. Over the last year, the consumer price index has increased by close to 2%. Therefore, we have to legitimately increase the salary of our employees, but also face a general increase of all the expenses of the Town. Cut here, cut there, and we can succeed in keeping the effect on the tax bill to around 0.5%.

Other expenses occur only once, or once every four years like the elections. The Council can then decide to use monies from the accumulated surplus of the Town to pay for them, without raising the taxes. But other expenses, once approved, will repeat from year to year.

This is the case for our actions against the Eurasian Milfoil. This harmful plant will not go away on its own. Should we act or not? Referring to our guideline for our actions, the answer is clear. In this case, patience would only render the problem inexorable. Council has prepared a plan of action (see the article of Councillor Jake Chadwick).

We have estimated that it will cost about \$20,000 to implement it. 4% in tax increase.

This is how we come to face an increase of 6.5% of the tax bill. And this will make for some teeth gnashing (mine also!). Everybody has probably forgotten that over the past 6 years, Council had managed to reduce the taxes, and that the increase of 2017 will simply bring us back to the level of 2010.

No one would dispute that leaving the Eurasian Milfoil to proliferate would result in an environmental disaster. But there exists a lowlier economical argument in favour of fighting this plague: its effect on the property values. It is not rare that the completely infested lakes have seen the property values around them melt by 25%. For Barkmere, with our small taxation basis and our restricted expenses, we could not reduce our budget by 25%. The properties in the village area would probably not be affected for sure. But they only represent 8.7% of the total value of Barkmere, and this proportion would climb to 11.5%. The tax burden would then move, and the taxes in the village would increase by 33%...

Should we act or not? We have decided to act. No nice Christmas present this year on our tax bill. But collectively, we are taking the right decision for our children, so they can continue to benefit from the fairytale magical Bark Lake.

I wish you very happy Holidays with your families!

*Luc Trépanier,*  
*Mayor*

**We would like to invite you to our Annual Holiday  
Season Luncheon which will be held Saturday,  
December 10th at Barkmere's Town Hall around  
12:00 noon**

**(after the council meeting)**

## LEGAL PROCEEDINGS UPDATE

By Stephen Lloyd

More than four years after the conflict arose, in August-September 2012, the Barkmere illegal road case will be finally going to trial. A full 8 days has been set aside by the lawyers, from December 12th to the 21st, for the hearing of the case at the Ste-Agathe courthouse. We are currently waiting to see if that date will be postponed, due to an ongoing strike among the Quebec government lawyers.

There have been many proceedings and interim hearings along the way. Most of the noise has been reduced down to just one issue. As a community, we will finally have it determined whether Barkmere's local by-laws on the safety and environmental impact of publicly-accessible roads apply **throughout** its territory, or only on private lands, i.e. lands which do not belong to the Government of Quebec. From the Town's perspective, this is a local matter, best dealt with by the municipality. From the Province's perspective, it already has general rules which apply to Crown lands across the Province, which it feels are good enough.

In the end, a judge will reduce this whole drama down to a technical legal decision. Both sides of course think they have a good chance of winning on the legal issue.

Why will that one legal issue take 8 days of trial to determine? Good question. Part of the answer is that trials involve people and emotions. Even technical legal judgments are influenced by context, particular facts and notions of justice vs injustice. All parties will be attempting to tell their side of the story and demonstrate why they are the "good guys", so that the judge will decide in their favour.

Could we have reached a compromise solution on this jurisdiction issue with the Government of Quebec? Presumably, yes. Good faith attempts were made, but ultimately no agreement could be reached.

Was all this really necessary? Recall that the Town was reacting in this case. Reacting to a position taken by a citizen, who, after many advance warnings to the contrary by the Town, decided on his own that an extension of Duncan Road could simply go ahead without a Town permit. The Town reacted to insist that the community needs to have a say on how its road network is developed. From the Town's point of view, it **had** to intervene to defend its by-laws.

After four years, tempers have cooled. The lawyers will do their best and we will see how the courts figure this one out. Stay tuned.

## CADASTRAL RENOVATION—UPDATE

By : Bruce MacNab

The cadastral renovation program in Quebec started 30 years ago. The renovation consists of correcting errors in the current cadastral plans, assigning a new numbering system to the lots, and to put all plans in electronic form that is accessible on-line. This accessibility to information on all lots will eliminate inconsistencies in lines between neighboring lots. As of now, more than 3.29 million lots have been formalized, representing about 86% of the 3.8 million targeted lots. The work should be completed in the next 10 years.

The cadastral renovation work in the Town of Barkmere is progressing, and all on-site surveys have been completed. Bérard-Tremblay, the firm mandated by the Quebec government to survey the lots in Barkmere, was on site for about 2 weeks this summer. All land owners will be invited to a consultation in the beginning of 2018 with the surveyor who prepared their plans. This meeting will allow the owners to present their opinion on the new representation of their property, and if he case, voice any disagreement with the proposed modifications.

## 2017 CALENDAR OF COUNCIL MEETINGS

January 14, 2017	July 8, 2017
February 11, 2017	August 12, 2017
March 11, 2017	September 9, 2017
April 8, 2017	-
May 13, 2017	November 11, 2017
June 10, 2017	December 9, 2017

Please note that council meetings are held on the 2<sup>nd</sup> Saturday of every month at 10:00 AM, except in October 2017 since there will be an election in November and no council meeting shall be held the month prior to an election.

## Municipal Building

By: Tim Kallil

On Saturday November 25<sup>th</sup> we held our first council meeting in the new municipal building. The meeting took place upstairs in the community center, and the new surroundings were appreciated by all who attended. In December, following the monthly council meeting, the mayor and council will host the annual Christmas party, and all are welcome and encouraged to attend.

The new building hosts offices, archives, and other town hall services on the main floor, accessible through the front door facing the parking lot. Upstairs, the community center boasts a large room, vaulted ceilings, and plenty of windows overlooking our beautiful lake. The community center is accessed by a side door facing the uphill side. There is a modest kitchen area, and there will be an area that we will call the “Heritage Corner” where artifacts, photos and documents, pertaining to the history of Barkmere and Bark Lake will be permanently on display. More to come on this subject in future municipal bulletins.

When entering the community center from the side entrance, washrooms, including wheelchair accessible facilities, are available for the public year-round. These washrooms can be accessed 24 hours a day, and will replace the seasonal outdoor washroom located on the east side of the parking lot. In fact, both levels of the building can be accessed by wheelchair.

All furniture and documents have been moved from the old building to the new, and the town employees are set up, and open for business.

The former town hall will have been demolished as this bulletin goes to press, and the previous community center will be transformed into a municipal garage by next spring. This will complete the upgrade project of our municipal buildings.

It is easy to forget that we weren't given any choice in replacing the old town hall and community center. Almost 3 years ago, council was made aware of some serious health risks concerning the town hall in particular. We had the responsibility as an employer, to test for certain dangerous substances used in the original construction, and the findings were that the building presented a possible health threat for those working in it. We subsequently were obliged to inform the CSST who condemned the occupancy of the old town hall. Our dedicated municipal employees were then asked to work in a cramped construction trailer, which was less than ideal, but through the entire process, no one complained. In looking at the new building, and the quality of the construction, we hope to have left future generations with the proper infrastructure they require, to keep Barkmere a viable and strong community through the 21<sup>st</sup> century.

## Environmental Matters

By Jake Chadwick

### Eurasian Milfoil

The discovery of Eurasian Milfoil in the lake in late July was a big shock to our pristine waters. Thanks to the keen eye and concern of a lake resident, we could act quickly. Imagine if that resident had not signaled us to the strange plant? We might have lost an entire season which could have severely reduced our ability to control it. I was very impressed with the dedication of our town management to mobilize quickly and secure the resources needed to remove the plants and survey most of the lake. Thanks again to all those who volunteered their time and resources during the summer.

It is a scientific fact that once milfoil is present in a body of water, it is virtually impossible to completely get rid of it. Only a few centimeters of the weed are necessary to take hold and multiply once again. We are lucky in that the plants were found in a limited geography around the lake and usually with relatively few plants. Even though we removed several thousand plants the experts who consulted us this past summer believe that we are “ahead of the curve” and with good discipline going forward, can control its proliferation. We have a very good record of where the plants were found and will be updating our database of knowledge from now on.

Your CCE together with town management has put forward an ambitious plan for next season to deal with the threat. We will be hiring a biology student for the bulk of the summer to manage the milfoil program which means coordinating the dive team and volunteers, manage the surveillance and removal if required as well as assisting with other priorities of the environmental program including water testing and septic system inspections. We have also budgeted for the dive team and their expenses. The program will run for approximately 6 weeks from mid-July through the end of August and we will review critical locations where milfoil was found this past summer and patrol the entire lake. We will also be working with the BLPA over the winter months to prepare training materials to further educate residents on the threat of milfoil proliferation and how best to prevent it. We hope that with further education we can count on all residents to be able to survey their water front and alert the team of any strange plants. **Reminder! – never attempt to remove any plants yourselves – leave this for “the pros”.** Uncontrolled cutting of the plants is the worst thing we can do.

Finally, the town will also be upgrading the boat washing system at the landing to ensure best practices are followed as well as putting in place actions to better manage access to the municipal boat launch.

### Septic System Monitoring

The quality of our information on septic systems continues to improve every year. Dave Williams Roy is doing an excellent job of following up and ensuring residents with deficient systems take the steps necessary to bring them up to standard.

## Water Quality

Despite some setbacks in resources available for water testing this past summer, we did conduct a good number of regular water tests on the lake and in the main tributaries. We are waiting for all the test results to be received after which the annual report will be prepared for presentation and publication at a spring council meeting. Of the test results I have received so far, there is nothing alarming to report. In fact, the average level of phosphorus in the lake seems to be lower this year than previous years which is good news. Overall water quality remains very good.

## Shoreline Restoration

All residents whose properties were deemed “highly disturbed” by Biofilia in their 2013 report were sent a letter from the town asking them to take steps to revegetate their shoreline. Many have complied, planted new vegetation and resolved the issues. Some have not responded and further steps will be taken to ensure proper actions are taken. There is no compromise on the provincial and municipal regulations regarding the protection of our shoreline. We count on your proactive cooperation in this area.

Our project last summer of replanting the area near the rental docks has been disappointing due to the continued use of the area for construction materials and equipment. Other shoreline initiatives continue to make good progress like the Tate Vandewater property which was replanted two summers ago after being heavily damaged by a storm.

## Hydro Quebec and the 4x4s

Agreement was reached with Hydro Quebec to close off the area upstream of the main inlet in Jack Rabbit park so that 4x4 cannot cut through the lake’s inlet stream and potentially harm the water. This is very good news and thanks go out to the team who spent tireless hours in meetings with Hydro Quebec and others on this initiative. Time will tell if it does indeed reduce traffic behind the lake. In any case, we will continue to monitor the water quality in the inlet stream.

## Light Pollution

There was much discussion during the summer about the outdoor lighting issue. It was worthwhile discussing because many residents have noticed a net reduction in outdoor lighting pollution since the topic was raised in the spring. While the bylaws regarding outdoor lighting are being looked at by council with the view of bringing them up to date with the current realities of technology, we will work with our diligent building inspector to ensure the current bylaws are applied, particularly with respect to docks and shoreline lighting where there has been a proliferation of solar powered LED lights installed which are frequently illuminated even when no one is home.

## BUDGET 2017

By: Marc Fredette

### Year 2016 in review

Based on 2016 preliminary figures (our financial year closes on December 31), we should be in a position to generate a surplus of approximately \$50,700. Total expenses were lower by \$69,000 versus what we had budgeted for 2016. The administration costs were lower than budgeted by \$59,000 mainly due to a reduction of \$49,900 in legal fees as the main legal case is postponed to probably 2017 due to an unlimited general strike of the Quebec government lawyers and notaries. Costs were lower than expected despite an unforeseen event this summer related to the Eurasian water-milfoil. Total costs for the removal and control of the plant is estimated to be at \$14,650 for 2016. Revenues were approximately \$28,000 above budget in part from higher transfer taxes, additional boat parking spaces and more fines issued by the town administration. We have therefore no need to utilise the full amount of \$62,000 we had budgeted from cumulated surplus from prior years. However, to offset the unplanned expenses related to the milfoil removal, we will use \$14,650 from cumulated surplus.

### 2017 budget

For 2017, we expect the expenses to increase by 11.6% from the 2016 budget to \$621,000 for a net monetary increase of \$64,500. We have reduced some expenses that we can control such as professional fees but the net increase can be explained as follows. First, following the 2016 discovery of the Eurasian water-milfoil, we are planning to actively pursue the removal and control of this invasive plant and have budgeted \$19,400 in 2017. Expect this expense line to be part of our cost structure going forward. Second, an increase of \$10,000, or 50%, in the fire protection coverage with the new structure imposed on Barkmere. Third, \$10,000 related to additional employee benefits, such as group insurance plans for \$7,000, and an expected salary increase of 2% to capture inflation. Fourth, we have budgeted \$10,000 for election expenses related to the paperwork required during an election year. Finally, an increase in amortization, a non-cash expense, of \$19,000 from the recent acquisition of capital assets. We expected revenues to be higher by \$6,000 stemming from additional dock rental spaces. In order to mitigate the increase and minimize the burden on the citizens for items such as higher legal expenses than normal and an increase in amortization expenses we will use \$70,000 from the surplus generated in prior years. Therefore, on a net basis, the general tax is expected to increase by 6.6% due to the planned milfoil activities and higher fire protection costs. Over the past eight years, we have maintained a tax rate as low as possible since the beginning of our mandate in 2010. Despite this significant increase in 2017, the tax rate is expected to be at the level of 2010.

### Unpaid taxes

As mentioned in our prior bulletins, we are focussing on reducing our taxes receivable to ensure all citizens pay their fair share of taxes on a timely manner. We have seen a reduction in accounts receivable and we thank all of you who pay on time. It reduces the amount of time spent on collecting past-due amounts. One property is being sold on December 6 for unpaid taxes. The town should get the uncollected taxes via the proceeds from the sales as a first ranked creditor. We have a few citizens that are delinquent and will receive notice shortly as a last warning before we move to sale their property for taxes.

Revenues			
	2015 Actual	2016 Estimated	2017 Budget
Taxes	\$464 605	\$452 201	\$470 791
Other revenues	\$90 092	\$70 792	\$80 184
Cumulated Surplus Allocation	-	\$14 649	\$70 000
<b>Total</b>	<b>\$554 697</b>	<b>\$537 642</b>	<b>\$620 975</b>

Expenses			
	2015 Actual	2016 Estimated	2017 Budget
General Administration	\$183 000	\$195 579	\$274 739
Public Security	\$97 250	\$93 054	\$104 738
Transportation	\$53 576	\$61 073	\$74 179
Sanitation, Environment	\$22 428	\$42 258	\$46 820
Land Use and Planning	\$73 624	\$67 225	\$70 749
Recreation and Culture	\$3 873	\$3 601	\$4 523
Amortization	\$20 109	\$24 108	\$45 228
<b>Total</b>	<b>\$453 860</b>	<b>\$486 897</b>	<b>\$620 975</b>
<b>Surplus (deficit)</b>	<b>\$100 837</b>	<b>\$50 745</b>	<b><i>Nil</i></b>

**Expenses - 2017 Budget**

## **Mayor's Report on the Financial Situation**

Pursuant to article 474.1 of the Cities and Towns Act, this is my report on the financial situation of the Town of Barkmere.

### **Financial Statements and Auditor's Report as of December 31 2015**

The audited financial statements as of December 31<sup>st</sup> 2015 were presented to the meeting of the Municipal Council on April 9<sup>th</sup> 2016. The surplus before investments was at \$117,420, for a net result of \$15,227, after investments, allocations and amortization expenses. The unallocated surplus of the Town at the end of the fiscal year was at \$27,488, since the Municipal Council had allocated \$262,000 to two projects: the new municipal building (\$150,000), the renovation of the dam (\$50,000) and to pay some non-recurring expenses (\$62,000).

### **Three Year Plan for Capital Expenditures**

As forecasted, the Town has proceeded in 2016 to invest in the installations of Goulden Island, using amounts from the Parks and Playgrounds Fund, and also purchased some wharves that were previously leased, to correct a paradoxical situation and reduce the operation costs. The Town has also replaced the garbage and recycling containers in the landing area and at Duncan Road. The results are positive, as illegal dumping has reduced in a significant way.

The Town has also built a new municipal building, combining the administrative offices with the community centre. This building was subsidized for 95% of its cost by the provincial and federal governments, therefore without any extra addition on the tax bill of the rate payers (the non-subsidized balance being paid with the accumulated surplus of the Town). In parallel to this project, other investments were made to demolish the old municipal office, to transform the old community centre into a municipal garage and to build better installations to decontaminate boats.

### **Preliminary indications for the results as of December 31<sup>st</sup> 2016**

We forecast, with reservations, that the Town of Barkmere should be able to show a surplus of about \$50,700 for the current fiscal year. And we will have to use only about \$15,000 of the cumulated surplus, instead of the \$62,000 that was budgeted for 2016. It is an unexpected result, but mostly due to the postponement of the trial opposing the Town to the Quebec government on the issue of the road built without a permit in Cope Bay. Another excellent result, for the sixth consecutive year, despite that we had to face expenses that were not forecasted like the actions taken to fight the expansion of the Eurasian Milfoil in Bark Lake.

## **General Orientations for the 2017 Budget**

Year 2017 will be more difficult. The Town is forced to sign a new fire services agreement, with the newly formed North-West Inter-municipal Public Company, which has taken over the former municipal fire services. This new company will operate with much higher costs than the previous service, of Montcalm and Huberdeau, and the result for Barkmere will be an increase of 50% of the bill, for the single year 2017, which is \$10,000 extra.

The infestation of Bark Lake by the Eurasian Milfoil will entail yearly additional expenses in environment, either directly to fight the expansion of the plants, or indirectly to improve controls in order to avoid other infestations. Council expects expenses of about \$20,000 to fight this scourge.

We hope to be able to reduce some expenses, in order to compensate the increase of other expense accounts, but not completely. We will therefore be forced to increase the general tax in 2017, by about 6%, to cover the additional costs in fire prevention and to fight the milfoil.

## **List of contracts involving expenditures of more than \$25,000 and of contracts involving expenditures of more than \$2,000 to the same contractor in excess of \$25,000**

During the same meeting of the Municipal Council on November 12<sup>th</sup>, I have presented the list of these contracts. Apart from the construction contract of the new municipal building, the total of invoices paid to the firm Gilbert Miller and Sons amounted to close to \$80,000, for snow removal, maintenance work on Duncan Road, various works in the landing area and to restore the site of the old municipal office.

## **Salaries of the Mayor and Town Councillors**

Pursuant to article 11 of the Act respecting the remuneration of elected municipal officers, here are the annual salaries of the Mayor and Town Councillors. As Mayor, I receive from the Town of Barkmere \$1,470 as taxable earning and \$735 as a non-taxable allowance. I receive from the RCM of the Laurentians, \$1,574 as taxable earning and \$787 as a non-taxable allowance. The Councillors of the Town of Barkmere each receive \$490 as taxable earning and \$245 as a non-taxable allowance.

## Echoes from Barkmere

By Chantal Raymond

We had the immense pleasure to hold our last council meeting in the new municipal building. The sight of Barkmere will decidedly change, for the best. Indeed, in addition to the new building, the old town hall will be demolished and obliterated shortly. The rented trailer is gone. We will also remove the latrines near the waste containers. Other changes planned at the landing: a new decontamination ramp will be built between the old town hall and the old community centre. The old community centre will return to its first mission as a garage and will therefore be equipped with a garage door where the town will store its boats, buoys, etc. The town wants to equip itself with a pontoon in order to facilitate material transportation and to help, notably for divers that will be hired annually to monitor milfoil.

Another change long ago announced but finally starting: the rope and wood games are finally being made on Goulden Island. However, the contractor has not been able to finish before spring, being surprised by the early arrival of snow. Hence, a story to be continued... Here is a preview picture of one of the games: the spider web.

In leaving, we are asking, once again, that you subscribe to electronic municipal bulletins. You will be informed faster and the budgetary health of our little town will thank you for it. Just go to [www.barkmere.ca](http://www.barkmere.ca), in the *communication* page and tick off the appropriate squares.
